

Community Feedback Report

Read to Succeed Program

The community have been asked for feedback about the program, and a survey was distributed via the same channels as the promotion for the program:

- Email, to parents children attending the primary school
- Posters, displayed at the book exchange and on the four community noticeboards around town. The posters include a QR code, which links to the online survey.

Ten community members have provided feedback and many did not add information in the comments section.

The feedback survey included the following statements. Each statement included with a scale and comment field as shown in the compiled responses below.

Comment (1)	You only see it if you park your car around that side of the school for pick-up			

The book exchange is in a location that is easily accessed.

Comment (1) There's never enough information about programs at the school, like this. I generally only find out by talking to other parents.
